About the Industry

As India's construction sector continues to expand, there is a growing emphasis on building practices that prioritise environmental performance and long-term efficiency. With buildings accounting for up to 40% of emissions, the need for climate-responsive design, energy-efficient materials, and sustainable construction technologies has become increasingly critical. Roofing, in this context, is emerging as a key lever in improving energy efficiency, reducing heat gain, and enhancing overall building performance.

The Indian roofing market, estimated at approximately **USD 8.6 billion in 2026** and **projected to reach USD 11.7 billion by 2031** is witnessing a clear shift towards advanced materials such as insulated panels, cool roofing systems, solar-integrated roofing, and metal-based solutions that support sustainability goals while improving durability and lifecycle value.

About the Roof India

The platform showcases a comprehensive range of roofing and allied products, covering segments such as roofing systems, cladding, pre-engineered buildings, metal building systems, tensile architecture, roof landscaping, waterproofing, insulation, roofing machinery, and fastening systems. It serves as a focused B2B meeting point for manufacturers, suppliers, builders, architects, and project consultants. Recognized as a key sourcing hub for the building, construction, and infrastructure sectors, the event supports business networking, product evaluation, and procurement for projects of all scales. The show continues to drive innovation and excellence in roofing technologies, bringing together market leaders, distributors, and decision-makers under one platform.

With the presence of 200+ brands from around the world and 9,000+ focused trade visitors from 20+ countries, Roof India further solidifies its position as a global hub for the latest advancements and trends in the roofing and construction industry.

Co-located Event

The Foundation of Modern Construction

As India accelerates towards large-scale infrastructure growth and advanced construction practices, **World of Concrete India (WoCI)** stands as the country's definitive platform for concrete technology, construction innovation, and structural solutions.

Bringing together industry leaders, technology pioneers, contractors, engineers, and project stakeholders, WoCI enables business connections, knowledge exchange, and technology adoption that drive the future of construction.

Co-located with Roof India 2027, the exhibition delivers a powerful industry convergence – integrating **concrete, structural systems, roofing, and building envelope solutions** into one comprehensive marketplace.

A Complete Construction Ecosystem
